IMPORTANT NOTICES

Safe harbor statement under the private securities litigation reform act of 1995

This presentation contains statements that, to the extent they are not recitations of historical fact, constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). All such forward-looking statements are intended to be subject to the safe harbor protection provided by the Reform Act. Actual outcomes and results could differ materially from such forecasts due to the impact of many factors beyond the control of AGNC Investment Corp. ("AGNC" or the "Company"). All forward-looking statements included in this presentation are made only as of the date of this presentation and are subject to change without notice. Certain important factors that could cause actual results to differ materially from those contained in the forward-looking statements are included in our periodic reports filed with the Securities and Exchange Commission ("SEC"). Copies are available on the SEC's website at www.sec.gov. AGNC disclaims any obligation to update such forward-looking statements unless required by law.

The following slides contain summaries of certain financial and statistical information about AGNC. They should be read in conjunction with our periodic reports that are filed from time to time with the SEC. Historical results discussed in this presentation are not indicative of future results.

CAPITAL STRUCTURE HIGHLIGHTS

AGNC Common Stock

Ticker	Nasdaq: AGNC
IPO Date	May 2008
Market Capitalization	\$11.9 B
Total Dividends Paid Since IPO¹	\$15.5 B
Total Stock Return Since IPO²	559%
Dividend Yield	13.4%

THE OBJECTIVE

Favorable long-term stockholder returns with a substantial dividend yield component

THE OPPORTUNITY

Agency-guaranteed residential MBS investments paired with highly attractive funding

THE IMPACT

Permanent capital supporting American homeownership across generations

ENDNOTES

Slide 3

1. As of Jan 15, 2026.
2. Total stock return includes common stock price appreciation and dividend reinvestment. Dividends assumed to be reinvested at the closing price on the ex-dividend date. Source Bloomberg.
3. Series C, D, E, F, G and H preferred stock are redeemable at the Company's option, in whole or in part, at their liquidation preference of \$25 per depositary share, plus any accumulated and unpaid dividends, on or after Oct 15, 2022, Apr 15, 2024, Oct 15, 2024, Apr 15, 2025, Oct 15, 2027 and Oct 15, 2030, respectively.
4. The Series C, D, E and F annualized dividend rate is as of the most recent dividend determination date. The Series C, D, E and F accrue at a floating rate equal to 3-Month CME Term SOFR plus 0.26161%, plus a spread of 5.111%, 4.332%, 4.993% and 4.697% respectively, per annum.
5. At the conclusion of the Series G initial fixed rate period on Oct 15, 2027, and every five years thereafter, the Series G dividend rate will reset to a rate equal to the five-year US Treasury rate plus a spread of 4.39%, per annum.
6. Each depositary share outstanding represents a 1/1,000th interest in a share of preferred stock.

Slide 4

1. As of Dec 31, 2025. Tangible Net Book Value Per Share and Total Common Equity Capital are net of the preferred stock liquidation preference. Tangible Net Book Value Per Share excludes goodwill.
2. Net Spread and Dollar Roll Income Per Share (f/k/a Net Spread and Dollar Roll Income, Excluding "Catch-Up" Amortization, Per Share) represents a non-GAAP measure. Refer to supplemental slides 15 and 28 in this presentation for a reconciliation and further discussion of non-GAAP measures.
3. Economic Return represents the sum of the change in tangible net book value per common share and dividends declared on common stock during the period over the beginning tangible net book value per common share.
4. Dividend yield as of Dec 31, 2025.

Slide 5

1. Portfolio includes net long position in forward purchases and sales of Agency MBS in the "to-be-announced" ("TBA") market as of quarter-end.
2. Average Asset Yield includes the average implied asset yield on TBA securities and excludes "catch-up" premium amortization cost/benefit for the period. Refer to slide 16 and related footnotes for additional information.
3. Leverage represents "at risk" leverage as of period end calculated as the sum of repurchase agreements used to fund Agency and non-Agency MBS and CRT investments (collectively "Investment Securities Repo"), net TBA position (at cost), net payable/receivable for investment securities not yet settled, and other debt divided by the sum of total stockholders' equity less goodwill. Leverage excludes Treasury securities repurchase agreements.

Slide 5 (Cont.)

4. Average Repo Cost includes Investment Securities Repo. Amount excludes U.S. Treasury repurchase agreements.
5. Average Cost of Funds includes Average Repo Cost, average implied funding costs of TBA securities and interest rate swap periodic income for the period. Amount excludes other supplemental hedges used to hedge a portion of the Company's interest rate risk (such as swaptions, SOFR futures, and U.S. Treasury positions) and U.S. Treasury repurchase agreements. Refer to slide 16 and related footnotes for additional information and to slide 22 for information regarding U.S. Treasury hedges and associated carry income / expense components.
6. Hedge Ratio calculated as the ratio of interest rate hedges to Investment Securities Repo, net TBA position and other debt as of quarter-end.
7. Duration Gap is a model estimate of the difference between the interest rate sensitivity of our assets and liabilities, inclusive of interest rate hedges, measured in years as of a point in time.

Slide 6

1. Net Spread and Dollar Roll Income Per Share - see Slide 4 endnote 2.
2. Operating Expense Structure calculated as total operating expense divided by average stockholders' equity for the period. Average stockholders' equity calculated as the average month-ended stockholders' equity during the period.
3. Economic Return - see Slide 4 endnote 3.
4. Total Stock Return - see Slide 3 endnote 2.

Slide 7

Slide 8

1. Source: Bloomberg.
2. Change in Treasury and swap prices derived from Constant Maturity Treasury and Constant Maturity Swap and DV01 from JP Morgan.
3. Source: Barclays.
4. CC represents the current coupon yield and is sourced from Bloomberg. 30 Yr Mortgage Rates are sourced from Optimal Blue. CRT spreads are the average spread on M2s at quarter end from deals priced in that quarter using spread or price data from JP Morgan. CMBS spreads are spreads to the Treasury curve and are averages of JP Morgan, Wells Fargo and Bank of America. CDX spreads are sourced from JP Morgan.

ENDNOTES (CONTINUED)

Slide 9

1. Amounts exclude AGNC's limited partnership interest in a mortgage credit investment fund totaling \$70 million and \$69 million as of Dec 31, 2025 and Sep 30, 2025, respectively, reported in Non-Agency Securities, at Fair Value, and Other Mortgage Credit Investments on the accompanying Consolidated Balance Sheet.
2. Specified pools include pools backed by lower balance loans with original loan balances of up to \$200K, HARP pools (defined as pools that were issued between May 2009 and Dec 2018 and backed by 100% refinance loans with original LTVs \geq 80%) and pools backed by loans 100% originated in N.Y. and Puerto Rico. Lower balance pools have a wtd. avg. original loan balance of \$181 K for \leq 15-year and \$142 K for 30-year securities as of Dec 31, 2025. HARP pools have a wtd. avg. original LTV of 128% for \leq 15-year and 142% for 30-year securities as of Dec 31, 2025.
3. Other pools with favorable prepayment attributes include those backed by loans with credit, loan balances, geographies, occupancy types, and other characteristics that exhibit favorable prepayment behavior.
4. Weighted average actual 1 month annualized CPR released at the beginning of each month based on securities held as of the preceding month-end, excludes net TBA position.
5. WALA represents the weighted average loan age presented in months, excluding net TBA position.
6. Average projected CPR as of Dec 31, 2025 excludes net TBA position.

Slide 10

1. Amounts include Investment Securities Repo and exclude U.S. Treasury repurchase agreements and debt of consolidated VIE's.
2. Refer to slide 16 for additional information regarding our average cost of funds.

Slide 11

1. Funding liabilities consists of Investment Securities Repo, other debt and net TBA position.
2. Duration is a model estimate of interest rate sensitivity measured in years as of a point in time.
3. SOFR Futures notional amount based on 2-year swap equivalent.
4. Total duration is expressed in the asset unit equivalent.

Slide 13

1. Net Long TBA and Forward Settling Securities are reported in derivative assets/liabilities at net carrying value (fair value less cost basis).
2. Tangible Net Book Value "At Risk" Leverage calculated as the sum of Investment Securities Repo, net payable/receivable for investment securities not yet settled, net TBA dollar roll position (at cost) and debt of consolidated variable interest entities divided by the sum of total stockholders' equity less goodwill. Leverage excludes Treasury securities repurchase agreements.
3. Tangible Net Book Value Per Common Share calculated as stockholders' equity, less the preferred stock liquidation preference and goodwill, divided by total common shares outstanding.

Slide 15

1. "Catch-up" premium amortization (cost)/benefit is reported in interest income on the accompanying income statement.
2. Reported in gain (loss) on derivative instruments and other securities, net in the accompanying income statement.
3. Other interest income (expense), net includes interest income on cash and cash equivalents; price alignment interest income (expense) ("PAI") on interest rate swap margin deposits posted by or (to) the Company; and other miscellaneous interest income (expense).
4. Net spread and dollar roll income exclude other supplemental hedges used to hedge a portion of the Company's interest rate risk (such as U.S. Treasury positions, swaptions, and SOFR futures) and U.S. Treasury Repo. For details on the Company's average U.S. Treasury position, yields, and cost of carry for Q4 2025 refer to slide 22.

Slide 16

1. "Catch-up" premium amortization cost/(benefit) is reported in interest income on the accompanying income statement.
2. Reported in gain (loss) on derivative instruments and other securities, net in the accompanying income statement.
3. TBA implied cost of funds derived from the Company's executed TBA roll levels and TBA delivery assumptions sourced from JP Morgan for the associated weighted average coupon, weighted average maturity and 1 month projected CPR. TBA implied asset yields derived from the implied funding costs and gross executed TBA roll levels.
4. Economic interest expense and cost of funds exclude other supplemental hedges used to hedge a portion of the Company's interest rate risk (such as U.S. Treasury positions, swaptions, and SOFR futures) and U.S. Treasury Repo. For details on the Company's average U.S. Treasury position, yields, and cost of carry for Q4 2025 refer to slide 22.
5. Calculated on a weighted basis relative to the average TBA balance and, as applicable, the average investment securities balance or average Investment Securities Repo balance outstanding.
6. Represents interest rate swap periodic (income) cost measured as a percent of total mortgage funding (Investment Securities Repo, other debt and TBA securities).

ENDNOTES (CONTINUED)

Slide 18

1. MBS includes CRT securities and other credit investments; TBA includes forward settling non-Agency securities.
2. Tangible net book value "at risk" leverage calculated as sum of Investment Securities Repo, other debt, net payable/receivable for investment securities not yet settled and net TBA and forward settling non-Agency positions (at cost) divided by the sum of total stockholders' equity less goodwill. Leverage excludes U.S. Treasury repurchase agreements.
3. Chart excludes 20 Yr fixed rate MBS.
4. Measured as the ratio of interest rate swaps, net U.S. Treasury position, SOFR futures, and option-based hedges (e.g., swaptions) over Investment Securities Repo, other debt, net TBA and forward settling securities positions (at cost).

Slide 19

1. Tangible net book value per common share excludes goodwill.
2. Economic return represents the change in tangible net book value per common share plus dividends per common share declared.

Slide 20

1. Asset yields include actual and implied yields on investment securities and net TBA position calculated on a weighted average basis. Amounts exclude "catch-up" premium amortization.
2. Cost of funds include Investment Securities Repo, implied funding costs for the net TBA position and periodic swap costs calculated on a weighted average basis. TBA implied fund cost is derived from AGNC's executed roll levels and TBA delivery assumptions sourced from JP Morgan for the associated weighted average coupon, weighted average maturity and 1 month projected CPR.
3. Represents a non-GAAP measure. Please refer to the supplemental slides within this presentation for a reconciliation and further discussion of non-GAAP measures.

Slide 21

1. Total fixed-rate MBS, excluding net TBA position, had a par value of \$76,713, market value of \$77,483, average duration of 4.2 years and average coupon of 5.19% as of Dec 31, 2025.
2. Specified pools include pools backed by lower balance loans with original loan balances of up to \$200K, HARP pools (defined as pools that were issued between May 2009 and Dec 2018 and backed by 100% refinance loans with original LTVs \geq 80%), and pools backed by loans 100% originated in N.Y. and Puerto Rico. Lower balance pools have a wtd/avg original loan balance of \$181 K for \leq 15-year and \$142 K for 30-year securities as of Dec 31, 2025. HARP pools have a wtd/avg original LTV of 128% for \leq 15-year and 142% for 30-year securities as of Dec 31, 2025.
3. Average MBS cost basis, WALA and CPR exclude net TBA position.
4. WALA represents the weighted average loan age presented in months.
5. Actual 1 month annualized CPR published during Jan 2026 for Agency securities held as of Dec 31, 2025
6. Duration is a model estimate of interest rate sensitivity measured in years as of a point in time.

Slide 22

1. The average U.S. Treasury securities and futures positions represent their average cost basis, weighted by the number of days outstanding during the quarter.
2. The implied yields for Treasury futures are calculated based on the "cheapest-to-deliver" security that can be delivered to satisfy the futures contract identified at the time the futures contract was initiated using data sourced from a third-party model.
3. The average implied funding costs for U.S. Treasury securities and futures position represents the average rate received on the Company's reverse repurchase agreements for the quarter.

Slide 23

1. Duration is a model estimate of interest rate sensitivity measured in years as of a point in time. The sensitivity analysis assumes an instantaneous parallel shift in interest rates and, consequently, does not include the potential impact of ongoing portfolio rebalancing actions.
2. Durations are expressed in years. Liability and hedge durations are expressed in asset unit equivalents.
3. Mortgage assets include net TBA position.

Slide 24

1. Interest rate and MBS spread sensitivity are derived from models that are dependent on inputs and assumptions provided by third parties as well as by our investment team and, accordingly, actual results could differ materially from these estimates. Rates are floored at zero percent.
2. Estimated dollar change in value expressed as a percentage of the total market value of "at risk" assets.

USE OF NON-GAAP FINANCIAL INFORMATION

In addition to the results presented in accordance with GAAP, the Company's results of operations discussed in this presentation include certain non-GAAP financial information, including "net spread and dollar roll income"; "economic interest income" and "economic interest expense"; and the related per common share measures and certain financial metrics derived from such non-GAAP information, such as "cost of funds" and "net interest spread."

Net spread and dollar roll income available to common stockholders is measured as comprehensive income (loss) available (attributable) to common stockholders (GAAP measure) adjusted to: (i) exclude gains/losses on investment securities recognized through net income or other comprehensive income and gains/losses on derivative instruments and other securities (GAAP measures), (ii) exclude retrospective "catch-up" adjustments to premium amortization cost due to changes in projected CPR estimates and (iii) include interest rate swap periodic income/cost, TBA dollar roll income and other miscellaneous interest income/expense. As defined, net spread and dollar roll income available to common stockholders represents net interest income/expense (GAAP measure) adjusted to exclude retrospective "catch-up" adjustments to premium amortization cost due to changes in projected CPR estimates and to include TBA dollar roll income, interest rate swap periodic income/cost and other miscellaneous interest income/expense, less total operating expense (GAAP measure) and dividends on preferred stock (GAAP measure).

By providing users of our financial information with such measures in addition to the related GAAP measures, we believe users have greater transparency into the information used by our management in its financial and operational decision-making. We also believe that it is important for users of our financial information to consider information related to our current financial performance without the effects of certain transactions that are not necessarily indicative of our current investment portfolio performance and operations.

Specifically, the Company believes the inclusion of TBA dollar roll income in its non-GAAP measures is meaningful as TBAs are economically equivalent to holding and financing generic Agency MBS using short-term repurchase agreements but are recognized under GAAP in gain/loss on derivative instruments in the Company's statement of operations. Similarly, the Company believes that the inclusion of periodic interest rate swap settlements in such measure, which are recognized under GAAP in gain/loss on derivative instruments, is meaningful as interest rate swaps are the primary instrument the Company uses to economically hedge against fluctuations in the Company's borrowing costs and inclusion of periodic interest rate swap settlements is more indicative of the Company's total cost of funds than interest expense alone. Finally, the Company believes the exclusion of "catch-up" adjustments to premium amortization cost is meaningful as it excludes the cumulative effect from prior reporting periods due to current changes in future prepayment expectations and, therefore, exclusion of such "catch-up" cost or benefit is more indicative of the current earnings potential of the Company's investment portfolio.

However, because such measures are incomplete measures of the Company's financial performance and involve differences from results computed in accordance with GAAP, they should be considered as supplementary to, and not as a substitute for, results computed in accordance with GAAP. In addition, because not all companies use identical calculations, the Company's presentation of such non-GAAP measures may not be comparable to other similarly-titled measures of other companies.

A reconciliation of GAAP comprehensive income (loss) to non-GAAP net spread and dollar roll income is included in this presentation.
